Maturity Model for Industry 4.0 (Roland Berger, THINK ACT, 2014)

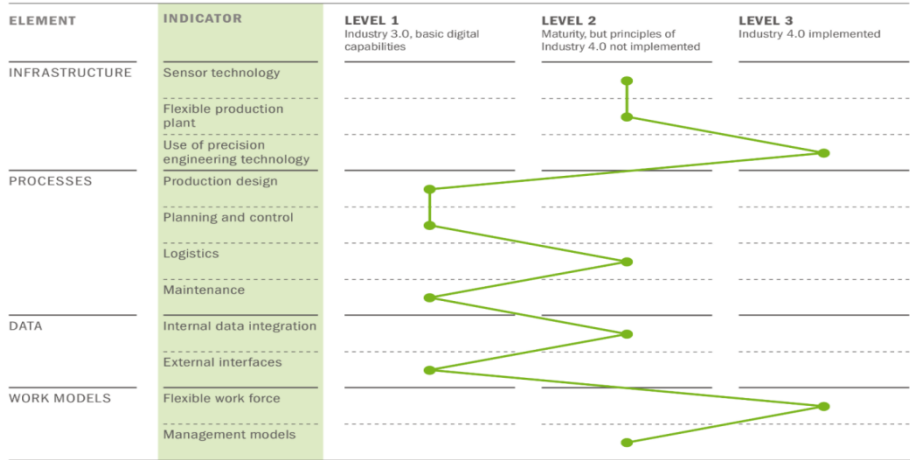

| ROLAND BERGER INDEX |

IS YOUR COMPANY READY FOR INDUSTRY 4.0?

What must companies do to boost their efficiency, quality and speed as they implement Industry 4.0? How can managers tap their company's potential? On top of its economic maturity index (see p. 39), Roland Berger Strategy Consultants has now also prepared an analytical index for managers and

entrepreneurs. The four most important factors are infrastructure, processes, data traffic and work models. These factors enable us to calculate a company-specific maturity index value highlighting how all departments must pull together. Our study is due out at the beginning of 2015.

COMPANY ANALYSIS BASED ON ROLAND BERGER'S MATURITY MODEL FOR INDUSTRY 4.0 (generic model)

Industry 4.0: Factory or Enterprise ?

(AéroMontréal Forum, H. Moustapha, Apr. 26, 2016)

Industry 4.0 is not only about **FACTORY**

It is the total **ENTERPRISE**

“Humans, computers, machines and products collaborate digitally and communicate seamlessly through **integrated and optimized processes** across the **total product value stream** within an **enterprise**, and **upstream and downstream** of the **enterprise**”

(Ref. Aérospatiale 4.0, H. Moustapha, Juillet 2016)

Aerospace 4.0™: Addressing the Total Enterprise

Customer Support**

As Sold, As Designed, As Planned, As Produced, As Maintained

Total Enterprise: “Aerospace 4.0™ KPI”

- 1. Design** Multidisciplinary Design Optimization “MDO” (CAD+)
- 2. Development** Simulation Life Management “SLM”
- 3. Manufacturing** Multidisciplinary Factory Optimization “MFO” (CAM+)
- 4. Product** Product Development Process “PDP”
- 5. Resources** Enterprise Resources Planning “ERP”
- 6. Customers** Customer Relationship Management “CRM”
- 7. Suppliers** Supply Chain Management “SCM”
- 8. Enterprise** Product Lifecycle Management “PLM”

And Workforce

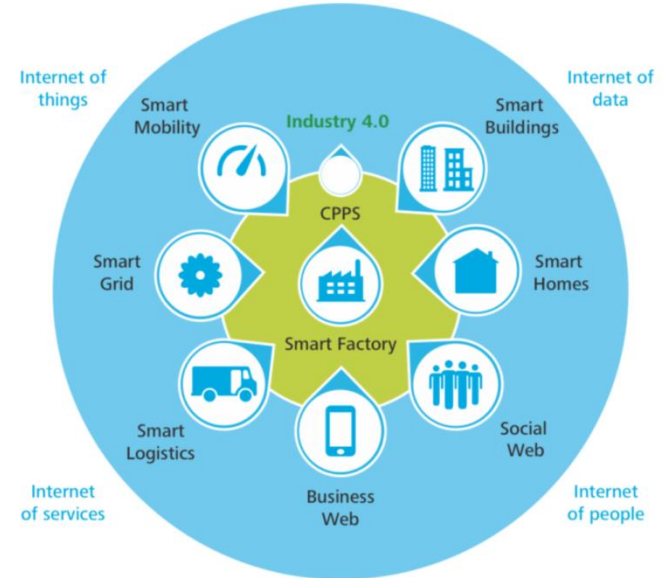

Industry 4.0: Nine Technologies (Germany, 2011)

Technology: “Aerospace 4.0™ KPI”

1. Simulation
2. System Integration
3. Internet of Things
4. Cloud Computing
5. Cyber Security
6. Augmented Reality
7. Big Data
8. Additive Manufacturing
9. Autonomous Robots
